Public Charity 501 (c) 3 EIN #20-5910283

## **Agenda Brainstorming for Future Art and Science Project**

Sat. February 5 from 3 to 5 pm

2487 Montgomery Avenue, Cardiff by the Sea, 92007

RSVP 760.943.0148 or [patricia@sdvisualarts.net](mailto:patricia@sdvisualarts.net)

### **Explanation: SDVAN Criteria for Project possibilities**

- Has to be fully MERC – aspects of mentoring, education, recognition and collaboration.
- Should create new audience
- Should be PR friendly and raise awareness about all participants
- Must include for profit corporations, businesses, individuals as well as non-profit associations
- Should display our community involvement
- Art should stimulate creativity in the sciences and vice versa
- Expansion of ideas / problem solving should be highlighted
- Cross pollination of art and science on the individual and association level should be present
- Guidelines should be positive and enhancing but set some restrictions

### **Reference: Historical Types of Collaborations**

Type I: Artists who collaborate with Scientists on common projects resulting in both the production of art works as well as scientific discoveries.

Type 1a: Scientists working with Artists to develop technological inventions

Type 1b: Artists working with Scientists to appropriate science for the arts.

Type II: Scientists who apply their scientific research to understanding creative activity in the arts in collaboration with Artists and not just using the artists as “subjects”.

Type III : Scientists or Artists with dual careers both as working scientists and exhibiting artists.

Type IV: Artists and Scientists who engage the arts and humanities to improve the ways that the sciences are communicated to the public.

### **Discussion Questions:**

1. What conditions have to be present for the "new" to occur?
2. What is a definition of creativity understandable by both the arts and the sciences?
3. How can we involve the corporate world in these projects i.e. what benefits them?  
(audience building, awareness, community involvement, accessibility)

Please RSVP and send further suggested questions for our discussion.

I am very much looking forward to an interesting discussion on a future Art and Science project.

With kindest regards

Patricia Frischer, coordinator SDVAN

Take 5 North or South to Birmingham. Turn west onto Birmingham toward the water. Go to Oxford and turn left again to the end of road, where you can only turn right on Kilkenny. On your right you will drive past an alley followed by a drive way. Ours is that driveway and entrance. You will see 2487 on the mailbox next to the drive way. Please note the entrance is on Kilkenny even though the address is Montgomery.
